

ABOUT US

Since 1967, The Witmer Group has maintained a solid reputation as one of the premier specialty contractors in Pennsylvania, Maryland, and Delaware. We specialize in projects with intricate masonry designs requiring superior craftsmanship, knowledge, and skill. Our team has the operational resources and bonding capacity to handle complex masonry projects, restoration services, waterproofing, caulking, air/vapor barriers, and coatings. We have performed work for some of the nation's top construction managers. Our experts provide the highest customer service, quality, and attention to detail.

THE WITMER GROUP IS YOUR PARTNER

We understand the value of investing in your building's exterior. We collaborate with you to develop a plan that ensures your new or existing building's exterior is expertly cared for throughout its lifecycle. As your partner, our team of craftspeople use their expertise at every step of the process. From assessment and beyond construction, we ensure the quality of materials and methods used meet your standards. Our reputation for excellence has been proven by our ability to deliver quality results on time, every time.

GOING FURTHER WITH SAFETY

We know that the integrity of a project revolves around best practices in all areas, including safety and compliance. Our safety program goes above and beyond standard federal and local safety and health regulations. Because the risk of injuries, loss, and damage to property and equipment is not acceptable, our stellar safety record means peace of mind for you.

A COMMITMENT TO THE CRAFT

Craftsmanship is honed, refined, and perfected over time. We are always working to make our craft better, fusing new techniques and methods of today with traditional methodology. With more than 54 years of experience, we passionately strive to deliver superior craftsmanship, so your building looks beautiful and – even more importantly – withstands the test of time.

MASONRY • RESTORATION • WATERPROOFING • COATINGS

INVESTIGATIVE SERVICES

Your building's first line of defense against environmental elements is the building envelope. Damage, which can range from minor to severe, can result from issues such as water infiltration, temperature variation, freeze-thaw cycles, acid rain, and ultraviolet radiation. The Witmer Group's investigative services help to preserve the exterior of your building and prevent future problems. We will provide a detailed condition assessment of the building, a plan of action for required repair procedures, and a long-term maintenance plan.

SEALANTS

Sealants play an important role in protecting your investment from the damage of water and moisture infiltration. Sealant life expectancy typically varies from 5 to 10 years, while some may require repairs after only a few years. Whether you are constructing a new building or have an existing one to maintain, our certified professionals deliver the precise services you need to help you in the long term.

INDUSTRIAL CONCRETE FLOOR REPAIR

Bringing a concrete floor back to its original state is critical to the safety and productivity of your facility. Not addressing deterioration issues can potentially cost lost time and efficiency. The Witmer Group investigates to help determine the causes of deterioration and will recommend only the most appropriate materials to make repairs. We follow through with the techniques necessary to achieve the most durable floor.

WATERPROOFING AND AIR VAPOR BARRIER

Witmer Waterproofing is a full-service waterproofing, air/vapor barrier, and caulking contractor for commercial, institutional, and industrial properties. We often work on complex commercial projects with unpredictable schedules, changes, and challenges. We are trained and certified by many of the leading waterproofing product manufacturers.

MASONRY RESTORATION

The Witmer Group is committed to preserving the historical and architectural integrity of buildings. We offer a broad range of restoration services including masonry restoration, historical preservation, structural rehabilitation, concrete repairs, maintenance, and investigative services. Our specialty is returning old masonry buildings to their original splendor. The Witmer Group has highly skilled and certified restoration experts with essential knowledge and the most effective restoration strategies.

CONCRETE COATINGS

High-Performance Coatings and Resurfacers. The foundation of our expertise and craftsmanship lies in our understanding of the substrates for concrete floors as key to extending the life of a floor that supports smooth operations and productivity. Our capabilities go beyond the building's floors with versatile chemical polymer products that address challenges inside of the building. HiTech offers a variety of floor coating, and resurfacing, including urethanes, epoxy resurfacers, and chemical-resistant coatings.

NEW MASONRY

Witmer Masonry is the premier contractor for large commercial, educational, and private masonry projects in PA, MD, DE, NJ, DC, VA. We solve complex masonry challenges and specialize in intricate masonry design requiring superior craftsmanship. We have partnered with leading architects, engineers, and contractors to build some of the most notable projects throughout the region.
